

BIG DATA OPTIMIZED. FOR HEALTHCARE.

Cirrus Seven provides healthcare analytics with Big Data as a Service (BDaaS) Stacks built on secure, optimized infrastructure managed by our engineers.

WE UNDERSTAND YOUR CHALLENGES

- **Accountable care requires analytics.** Cirrus Seven deploys the analytics software you need on Big Data as a Service Stacks that we manage, leaving you to focus on patient outcomes.
- **Understanding patient populations is rewarding.** You want to drive outcomes and revenues with the right data in the right analytics tools. Cirrus Seven's BDaaS Stacks are the fastest, simplest way to get the metrics you need and add value to your data.
- **Technology advances demand new systems.** Software upgrades, security patches, and new technology are our worry. We make sure you stay current on our secure, optimized infrastructure.
- **Security and privacy are paramount.** All Cirrus Seven BDaaS Stacks are fully HIPAA compliant and built to the highest security standards. Our infrastructure is inherently more secure than our competitors' "everything shared" offerings.

What we do. Cirrus Seven provides integrated Big Data as a Service (BDaaS) Stacks built on optimized infrastructure managed by our engineers. Clients in financial services, media, retail, and healthcare run their high-performance big data analytics systems on Cirrus Seven infrastructure.

Who we are. Our leadership team has built sector-changing enterprise commerce and multi-channel analytics companies. Our engineering team has decades of experience building secure, high-volume computing platforms serving critical SaaS solutions to Fortune 500s and managing some of the web's most data-intensive applications.

What we offer. Cirrus Seven uses both dedicated hardware and shared systems to provision flexible BDaaS infrastructure from tailored computing, storage, network, and related services.

BDAAS STACKS: OUR CORE OFFERINGS

EASY BDaaS DEPLOYMENT ON HIPAA-OPTIMIZED INFRASTRUCTURE

Managed Hadoop™ as a Service for companies who need Hadoop without its complexities or management hassles. Runs in Cirrus Seven's bare-metal environment and frees you to focus on analytics rather than IT operations.

Managed Datameer™, ParStream™, DataStax™, Adobe Data Workbench™ and a growing list of leading big data and analytics products and services, all optimized for the best performance and value.

Cirrus Seven VPC is a secure, elastic cloud built on a rigorously engineered configuration of compute, storage, network, and related capabilities to meet the most demanding requirements.

CIRRUS SEVEN FOR HEALTHCARE ANALYTICS

BIG DATA EXPERTISE FROM PROOF-OF-CONCEPT TO DEPLOYMENT AND BEYOND

We are the leader in provisioning and operating optimized BDaaS Stacks over the entire lifecycle of big data and analytics systems.

Cirrus Seven BDaaS frees you from the capital expense such systems require. We provide the difficult-to-hire skills needed to optimize performance, and our systems run up to 50% faster than competitors' offerings.

Cirrus Seven easily handles high-volume, secure data acquisition system requirements, boosts productivity, and provides the best overall return on investment.

WE WORK WITH

- **Healthcare analytics firms**
- **Healthcare providers**
- **Insurance and Financial Services firms**
- **Companies in highly-regulated industries**
- **Organizations with sensitive information to protect**

WHY WORK WITH US?

Cirrus Seven is different: get more value from your data, not more infrastructure to run it.

- **We are data processing and analysis experts.**
- **Our optimized systems deliver maximum performance with no wasted resources.**
- **Our prebuilt stacks deploy in minutes.**
- **We have simple, transparent pricing.**
